Introduction Of Continuous Frying Machine For Shrimp Chips

The continuous high quality commercial frying machine for shrimp chips can use electricity, oil, gas and coal heating. To prevent excess oil oxidation, our shrimp chips frying machines heat central section of oil layer, and control the temperature of upper and lower layer oil. Continuous shrimp chips deep fryer machine plant have double layer belt, can fry the products evenly, the products frying between two layers of wire belts, so that they can not run away freely. The stainless steel wire belt can transport the products with adjustable speeds, prolong the oil's life span, our continuous fryer machine can automatically filter the oil, control the oil's temperature during the continuous food fryers process.
