How Do You Make Baby Powder And Nutrition Powder?

Introdução detalhada :

1.What Is Baby Powder And Nutrition Powder Automatic Process Line?

?1?Automatic baby powder making and processing equipment production line takes rice, corn, beans and various kinds of miscellaneous grains as raw materials.

?2?Through extruding, aerating, drying, crushing and mixing, it can produce many kinds of nutritional powders, such as baby rice flour, sesame paste, bean flour, etc. The production line can automatically complete all the processes from feeding to the end.

?3?It has the features of easy operation, no dust leakage, hygiene, energy saving, easy to add various raw materials and nutrients, etc.

2.How To Make Baby Powder And Nutrition Powder?

(Raw material crusher) --- Powder mixer --- Screw conveyor ---Double /Twin-screw extruder --- Wind feeder --- Oven/dryer --- Wind feeder/cooling conveyor --- Crusher --- Screw conveyor ---- Horizontal mixer ---- (Packaging machine)

3.What Type Of Nutritional Powder Is It?

?1?Once thought of as a supplement only for bodybuilders, protein powders are now gaining popularity among the growing number of people who love to work out and supplement their protein while improving their health. In fact, the potential benefits of protein powder extend far beyond the gym. Studies have shown that this superstar supplement is more than helpful in everything from improving skin health to boosting immunity.

?2?Produced from both plant and animal sources, protein powders are now available in many types and can be adapted to any diet plan, taste or personal preference.
?3?Some of the most common types on the market today include?Pea Protein / Collagen / Whey Protein / Casein / Soy Protein / Bone Broth Protein / Rice Protein / Egg White / Hemp Protein / Mixed Vegetable Protein

4.What Is Baby Powder And Nutrition Powder Automatic Process Line Details?

Application	Baby Food
Machine Name	LOYAL Nutrition Rice Powder Making Processing Line
Raw Materials	Corn Flour, Rice Flour...
Capacity	100-150kg/H, 200-250kg/H, 300-500kg/H
Motor Brand	Siemens, China Famous Brand
Screw Materials	38CrMoAl Alloy Steel, Which Has Long Lifetime
Feature	Automatic, Low Consumption, High Quality
Electric Parts	LG, FUJI, Omron etc

5. What Is Baby Powder And Nutrition Powder Automatic Process Line Parameter?

Model	LY65	LY70	LY85
Installed Power	77KW	108KW	150KW
Power Consumption	50KW	75KW	100KW
Capacity	120-150KG/H	220-260KG/H	300-500KG/H

6.What Is Baby Powder And Nutrition Powder Automatic Process Line Advantages?

Baby powder and nutrition powder automatic process line from the feeding process automatically completed, simple operation, no dust leakage, health and energy saving, can easily add a variety of raw materials and nutrients.

7.What Is Baby Powder And Nutrition Powder Automatic Process Line Application?

The baby powder and nutrition powder automatic process line can not only produce various kinds of nutritional powders, but also produce diversified modified starch series products by adjusting the barrel and screw structure of twin-screw extruder. These modified starch series products can be applied to textile manufacturing, food processing, paper making, building materials, casting, oil drilling and other fields.
