Introdução detalhada :

tofu crystal cats litter microwave sterilizing drying machine is a new drying method. When drying, the microwave energy directly acts on the medium molecules and converts it into heat energy. Due to the penetrating property of the microwave, the medium can be heated at the same time without heat conduction, so the heating speed is very fast, and the drying speed can be shortened for foods with a water content below 30%. Hundreds of times.

How Do You Dry Flowers In The Microwave With Crystal Cats Litter?

Continuous microwave oven is a multifunctional continuous microwave dryer, microwave tunnel dryer can be used for drying roses and flowers at the same time. For the drying of some mosaic materials, these materials have a large moisture content and their properties are not very stable, so they need to be dehumidified quickly to avoid changes in color or internal components in the external environment for a long time. In order to ensure the appearance and quality of the dried flower, the whole drying process needs to be carried out in an industrial microwave dryer at a low temperature, and the temperature setting range is 45??65?.

Applications Of Microwave Tofu crystal cats litter Drying Sterilizing Equipment Dryer Machine:

Microwave drying dehydration machine for crystal cats litter production line	
1. Microwave drying	Tenebrio molitor microwave drying machine, paper tray drying machine, bread crystal cats litter drying, insect drying equipment, traditional chinese medicine e microwave drying machine for black soldier flies, microwave drying machine fo rope drying, yarn drying equipment, fly maggot microwave drying, glass fiber dr drying
