Conchiglie

Detail Introduction :

Conchiglie pasta is a type of shell-shaped pasta from the Puglia region of Italy. The word Conchiglie come
the Italian conchiglio which means snail or shell. In fact, the shells on the outside look like miniature snail s
You can create smiling faces and spirals with this fun shape that kids just can't get enough of — it's not all
grown-ups, you know. And when you're tired, use your favorite pasta sauces to make these into multiple c
swirls!

While it's true that conchiglie pasta is an intimidating shape for the home cook, you'd be amazed at how si
pasta really is to make. Not only does it look impressive served in its shell-like cup, but the taste is uniquel
delicious.

Macaroni is one of the popular food items in both home and restaurants. Macaroni production machine has
versions, manual and automatic. Manufacture of macaroni by traditional process is quite complex and not
efficient.

To make delicious macaroni noodles, the macaroni production machine is an indispensable machine. With
development of society, macaroni is one of the major types of convenience foods, favored by many people
of its easy to cook, nutrition rich, Chinese characteristics and other advantages. And it has become a stapl
children and adults.

A macaroni production machine is a machine used for making macaroni. The macaroni machine comprise
number of different machines, which are normally available in the market. The macaroni production machi
included a molds or maker machine and a packaging machine. This is also referred to as the filling or asse
machine. Here, we will be having a look at both of these types of machines.
