?3?Some of the most common types on the market today include?Pea Protein / Collagen / Whey Protein / Casein / Soy Protein / Bone Broth Protein / Rice Protein / Egg White / Hemp Protein / Mixed Vegetable Protein

4.What Is Baby Powder And Nutrition Powder Automatic Process Line Details?

Application	Baby Food
Machine Name	LOYAL Nutrition Rice Powder Making Processing Line
Raw Materials	Corn Flour, Rice Flour...
Capacity	100-150kg/H, 200-250kg/H, 300-500kg/H
Motor Brand	Siemens, China Famous Brand
Screw Materials	38CrMoAl Alloy Steel, Which Has Long Lifetime
Feature	Automatic, Low Consumption, High Quality
Electric Parts	LG, FUJI, Omron etc

5. What Is Baby Powder And Nutrition Powder Automatic Process Line Parameter?

Model	LY65	LY70	LY85
Installed Power	77KW	108KW	150KW
Power Consumption	50KW	75KW	100KW
Capacity	120-150KG/H	220-260KG/H	300-500KG/H

6.What Is Baby Powder And Nutrition Powder Automatic Process Line Advantages?

Baby powder and nutrition powder automatic process line from the feeding process automatically completed, simple operation, no dust leakage, health and energy saving, can easily add a variety of raw materials and nutrients.

7. What Is Baby Powder And Nutrition Powder Automatic Process Line Application?

The baby powder and nutrition powder automatic process line can not only produce various kinds of nutritional powders, but also produce diversified modified starch series products by adjusting the barrel and screw structure of twin-screw extruder. These modified starch series products can be applied to textile manufacturing, food processing, paper making, building materials, casting, oil drilling and other fields.
