

# Industrial Microwave Epoxy Drying Technology

## Introducción detallada :

### Introduction Of Microwave Epoxy Drying Machine:

A microwave epoxy drying machine is a type of industrial drying equipment used for the efficient and drying of epoxy resin. The machine utilizes microwave radiation to heat the epoxy resin, causing the molecules within the resin to evaporate quickly. This process is much faster than traditional drying methods and can significantly reduce the overall drying time. The microwave epoxy drying machine typically consists of a stainless-steel cavity, a microwave generator system, and a control panel. The epoxy resin is placed inside the cavity and heated using microwaves. The drying temperature and time can be adjusted using the control panel, allowing for customized drying processes.

### Parameter Of Microwave Epoxy Drying Machine:

|   |  |
|---|--|
| 1. Equipment Model                      | LY-60HM (Continuous)                             |
| 2. Equipment Power                      | 90Kva  |
| 3. Microwave Power                      | 60Kw (Adjustable)                                |
| 4. Equipment Size (Length*Width*Height) | 10520*1802*1750mm (Size Can Be Customized)       |
| 5. Equipment Material                   | The Whole Machine Is Made Of 304 Stainless Steel |

|                       |                  |
|-----------------------|------------------|
| 6. Equipment Capacity | 800~1000 Kg/Hour |
| 7. Equipment Color    | Silver           |

### Feature Of Microwave Epoxy Drying Machine:

1. Efficient and rapid drying: the use of microwave radiation enables the epoxy resin to dry quickly and efficiently, reducing overall drying time.
2. Energy-efficient: the use of microwaves significantly reduces energy consumption, making it an environmentally friendly and cost-effective option.
3. Versatile use: the machine can be used for drying other materials such as ceramics, electronic components and polymers - making it a versatile option for various industries.
4. Safe to use: the microwave epoxy drying machine is designed with safety features such as temperature and power controls, ensuring safe usage at all times.
5. Easy to operate: the control panel is user-friendly and easy to operate, making it accessible to operators at different skill levels.

### Details Display Of Microwave Epoxy Drying Machine

## Applications Of Microwave Epoxy Drying Machine:

|   |                                     |  |
|---|-------------------------------------|--|
| 1 | Production of electronic components | The microwave epoxy drying machine can be used to dry and cure epoxy adhesives used in the production of electronic components such as circuit boards. |
| 2 | Aerospace industry                  | The machine is suitable for the production of high-performance composite materials used in the aerospace industry.                                     |
| 3 | Automotive industry                 | Epoxy resins are used in the production of automotive components such as bumpers, doors, and body panels.  |
| 4 | Manufacturing industry              | The machine can be used in the manufacturing of various products such as jewelry, toys, and household items that use epoxy resins.                     |
| 5 | Medical industry                    | The machine can be used to dry and cure epoxy resins used in the medical industry for dental implants, orthopedic implants, and other medical devices. |

## Advantages Of Loyal Microwave Drying And Sterilization Equipment:

1. Adopt Food Grade Stainless Steel, Nice Appearance, Easy To Clean.
2. Microwave Can Penetrate Through The Materials So That The Inside And Outside Are Heated At The Same Time, Short Processing Time, Evenly Drying And Thorough Sterilization. No Extra Heat Loss, High Heat Efficiency, Saving Energy.
3. Thermal Effect And Non-Thermal Effect Work Together, Achieving Ideal Sterilization Effect At Low Temperature And Short Time, The Vegetable Can Keep Their Nutrition Components To The Maximum.

4.Adopt Non-Contact Infrared Temperature Measurement Technology, High Precision, Automatic Control

5.Frequency Adjustable Conveyor Speed, Step-less Adjustable Microwave Power, Instant Heating And Thermal Inertia,Convenient Operation.
