COMPANY INTRODUCTION

The pet food processing line is made of food-grade stainless steel. The entire production line has a very high quality, is not easy to be damaged, has a long time of use, is easy to maintain, and has high production efficiency and production quality. The cost performance is also very high. The dog food manufacturing equipment has been exported to many Countries and regions. The pet food processing line has protein and other nutrients that pets need, with a balanced combination and a delicate taste, which is very suitable for pets. The processing line uses meat meal, bone meal, soybean meal, fish meal, etc. as the main raw materials, with appropriate minerals and trace elements, to produce healthy and nutritionally balanced pet food.

Pet Food Production Line

Advantages of processor process

The Advantage Of The Automatic Pet Food Production Line	
Extruders Process Running Fast	Pet food extruder continuous running, high quantity capacity, can meet strict production deadlines.
Different Textures And Colors	variable density, air and moisture content, chewiness, crispiness, etc. It can produce pet treats food like strip shape, stick shape, twisted stick shape, double colors and multi-colors core filled snack.
Efficient	The pet food extruder continuous processing is low in cost, precise process control and automation reduces waste and boost, easy cleaning and maintenance.
Consistent	Dog food manufacturing equipment and cutting produces a very uniform end product of constant cross section and size. The process is extremely controllable and reliable, allowing high quality to be maintained throughout.
Automation Control	Automation control to ensure consistent quality and product features.

Nutrition receipt	Pets can absorb nutrition elements during enjoy chewing these delicious snacks. Automatic dog food manufacturing equipment not only provides nutrition to dogs, like protein, fat, vitamin, etc, but also satisfies the pet nature hobby, benefits its strong teeth, cleans mouth and teeth, and prevents disease.
Ingredient Flexibility	Dog food manufacturing equipment is adaptable, for application to a wide range of raw materials. Also, extrusion can produce pet treats in a variety of shapes and colors.
