Flow Chart Of The Fried Corn Chips Snacks Processing Line

WHY CHOOSE THE SUN CHIPS MULTIGRAIN SNACK MACHINE TO MAKE FRIED SNACKS?

1. The automatic control of oil temperature which can be set from 0-220°C during the whole operation applies to frying the foods with various process requirements.
2. The filling valve is installed in the oil layer at bottom and the water can be added at any time without affecting the frying process. The equipment is also equipped with the check valve which can solve the problem that oil flows back to the water pipe in case of water supply is cut off.
3. The foods produced by the technology of this frying equipment have a better degree of finish with bright color.
4. Fully automatic, can save labor for manufacturer.
