Heart Shaped Pet Cookies/dog biscuit making mac

Detail Introduction :

The dog biscuit production line is a comprehensive system that integrates mixing, shaping, baking, and packaging probegins with a mixer where ingredients are blended to perfection. Next, a molding machine shapes the dough into variable friendly designs. The biscuits are then baked in an oven to ensure they are both crispy and nutritious. Finally, an auto packaging machine ensures each batch is securely sealed and ready for market. This automated line guarantees consist quality, high efficiency, and meets the diverse needs of pet owners.
