Fryer	Fried boiled noodles to shape and taste delicious
Cooler	cooling fried noodles
Packing Machine	To packing the finished noodles

Instant Noodle Extruder Machine Plant Working Description:

Instant Noodle Extruder Machine Plant Working Description

Operation	Description
1.Mix into dough	Put the prepared flour and water,salt into the dough mixer, and then continue to mixing until the dough is mixed
2.Rolling dough	The dough passes through multiple rolling rollers continuously, to be a layer
3.Cutting extruded noodles	In order to make noodles curved, noodles are cut into curved noodles through an instant noodle forming knife
4.Steamed raw noodles	The cut raw noodles pass through a long steaming box, while steaming, the speed of the conveyor belt is increased, and the noodles are gradually pulled into the whole process, whole processing only takes two minutes
5.Paint oil on the surface of the noodles	Paint oil on the surface of the noodles to prevent the dough from sticking together. The noodles were elongated in the previous step, so that the oil can be applied more evenly.
6.Cut into one piece	The noodles coated with oil are cut by a rotary knife, the portion cut in one circle is one piece. Usually the length of the cutted noodles is 30cm, which is the most suitable length for people to grip when eat.
7.Serving a single serving of noodles	Each cutted noodle will be individually placed in a perforated stainless steel filter on the frying machine, waiting to be fried.
8.Frying noodles	Each piece of noodles is thoroughly fried at an oil temperature of 130°C ~ 140°C to complete the dehydration and hardening process.Required oil volume is 1200kg.
9.Cooling process	The fried noodle cakes are very hot , need to be cooled in an air-cooling cooler to 35? ~ 40?.

Main Features Of Instant Noodle Extruder Machine

Main Features Of Instant Noodle Extruder Machine

ITEM	MAIN FEATURES OF INSTANT NOODLE LINE
1	Instant noodle line adopt food-grade stainless steel, which is longer service life and neatness
2	All motors and spare parts adopt the famous brand,to ensure the strong quality
3	Pressing & Shaping Machine, Cutting Machine and Frying Machine are all frequency control.
4	The size of noodles can be adjusted easily.
5	High automation, convenient operation, low energy and small floor space.
6	Easy operation ,3-4 workers enough
7	Compact structure ,Small footprint

8	Instant noodle can be packed in bag or cup for sales.
9.Cooling process	The fried noodle cakes are very hot , need to be cooled in an air-cooling cooler to 35? ~ 40?.
10.Inspection	Weigh the noodles first, to check if its meet the standards, and then check whether they are mixed with metal or other substances by X-ray machine. Most of them also need to manually check whether the shape of the noodles is normal.
11.Put the flavoring bags/oil bags	After each noodles cake passes through the material package machine on the conveyor belt, a package of seasoning package is placed on it.
12.Instant noodles Packing	The packaging bag is marked with the production date by a V-shaped machine, then the noodles are wrapped, and finally each side is divided and sealed by a heat-sealing hob at the end of the assembly line.
13.Second-quality inspection	The packaged surface must be weighed and irradiated by X-ray machine, and the package must be manually checked for leaks, offsets, discoloration and other problems.
14. Third-quality inspection(by worker)	Artificial edible tasting, to detect whether the taste of instant noodles is good enough.
