## The Kurkure production line?

1. Product introduction of 35kw Power Snack Baked Kurkure Extruder Machine/ Kurkure Production Line Stainless Steel:

Cheetos is a special squeezed snack that is very crunchy in your mouth. The corn grits are mixed with a certain proportion of water and then enter the rotary head extruder.

**35kw Power Snack Baked Kurkure Extruder Machine/ Kurkure Production Line Stainless Steel**  
The Kurkure production line is a new type of extruded small food production equipment. Corn strips are made of corn dregs as the main raw material. Under the squeezing and kneading action of the squeezing turntable, the irregularly twisted strips are extruded. According to customer requirements, they can be cut into products of different lengths, and then baked or fried. After seasoning, corn noodles with rich flavors can be produced, which are widely favored by consumers because of their crispy, delicious, nutritious and delicious flavors.

#### **Raw materials:**

Adopts corn grits as raw materials meanwhile mixing with water and oil.
