Introduction to the characteristics of Cereal Bar Production Line

Detail Introduction :

Influenced by the Internet media and the improvement of the public's economic level, the concept of healthy diet has been deeply rooted in people's hearts, resulting in the emergence of many healthy f products, one of which is cereal bars.

The cereal bar is a snack food made of corn, oats, buckwheat, millet, nuts, and other ingredients, whi add some trace elements and are very rich in nutrition. It is why cereal bars have become a healthy b food for many consumers who believe that they can make their bodies healthier by eating them.

As a cereal bar manufacturer, we have always strived to provide higher quality cereal bars to our cus and over the years, we have used a variety of equipment. Recently, the Cereal Bar Production Line er very high reputation in the industry and has an excellent evaluation, so we decided to try this produc

After a period of use, we found that the cereal bar equipment does have outstanding performance a outstanding advantages.

What are the advantages of the Cereal Bar Production Line?

1. It is made of 304 stainless steel, which is resistant to wear and corrosion, and the quality is very rel
2. Cereal Bar processing equipment has a high degree of automation, with very high production effici
3. PLC control system makes the operation very simple. Ordinary workers can easily operate after sin training.

4. Easy maintenance and low maintenance cost.

5. Can process and produce many types of food.

6. Customizable cereal bar processing machine, the length of the cereal bar can be adjusted at will.

7. No pollution in the production process, no "three wastes" problem.

The production line consists of boiling sugar pot, mixer, loading machine, forming machine, coating equipment, dryer and packaging machine, etc. It is very flexible to use, even if you buy one of the ind equipment is also possible. In addition to this, the manufacturer has also developed a variety of diffe models for the majority of food processors to choose from.

Models of Cereal Bar Production Line equipment and technical parameters:

Model	010	020	030	040
Voltage	380v/50Hz	380v/50Hz	380v/50Hz	380v/50Hz
Power	60KWKW	80KW	100KW	150KW
Yield	300-600kg/h	400-700kg/h	600-900kg/h	1000-1500kg/h
Manpower	1-2 people	1-2 people	1-2 people	2-3 people
Size	1.2*0.7*1.3m	1.3*0.8*1.4m	1.5*0.8*1.5m	1.9*1.1*1.7m

When choosing, the manufacturer only needs to choose according to their own needs, and can even customize, no matter what kind of needs. The engineers of this enterprise will communicate with us a give the most comprehensive solution.

The production line can process and produce cereal bars, energy bars, protein bars, meal replaceme nut bars, nougat, and other cereal products with very high quality and good cutting and molding. It is recognized by consumers and allows us to expand our market further.

With the Cereal Bar Production Line, we can really feel the charm of quality equipment, and it is very
increase productivity with quality equipment. The market demand for cereal bars is very high today, a
trend is rising rapidly, and the market competition is getting fierce. In such an environment, only high
equipment can stand out in the market.

The production line brings us great potential for development and gives us greater confidence to exp
market. We believe that with the help of the production line, we will definitely usher in more consum
recognition and let our enterprise gain further development. At the same time, we also expect that th
processing industry can create greater glory with our joint efforts!
