IS POTATO CHIPS MAKING BUSINESS PROFITABLE?

Potato Chips/ French Fries Making Machine

Potato Chips Making Processing Products Sample

According to relevant data released by the State Council, the annual output value of the domestic snack industry has reached 2,215.6 billion yuan. It is expected that this year, the total output value of the domestic snack industry will reach 3 trillion yuan. In the past two years, people have pursued freshness and individuality in food consumption, but no matter how the Internet celebrity models are replaced, snacks havealways occupied the top consumption list of residents. "Food goods" has become more and more a label, hanging on many young people. The post-90s and post-00s are the main force of snack consumption, and their increasing consumption level has also continuously stimulated the vitality of the leisure snack industry. As a traditional snack food, potato chips have a development history of more than 160 years, but they are still enduring in the snack market and occupy half of the industry. Industry insiders said that in recent years, the potato chip industry has continued to integrate capital, and accelerated the laying of sales channels. The penetration rate of domestic potato chips has reached nearly 80%.
