Why Choose Groundnut Frying Machine To Fry Groundnut?

	Features Of Gas Deep Fryer Machine Groundnut
1	Gas Deep Fryer Machine Groundnut adopts digital temperature control and is accompanied a high-temperature upper limit power-off function, and the temperature rise is absolutely safe.
2	The upper and lower double-layer mesh belts are designed to keep the frying color uniform when product floats during the frying process, and will not cause uneven frying of the floating food.
3	The advanced and efficient heating system, and the oil tank adopts heat preservation technolo which not only saves energy but also improves work efficiency.
4	The oil-water mixing process design is adopted. Chin Chin residues produced during the fry process can sink into the lower funnel through the filtration of water and be discharged through sewage outlet, which not only achieves the function of filtering oil but also does not waste oil.
5	Constant temperature continuous production ensures the consistency of the temperature and time the fried food.
