

Stainless Steel Jam Center Snack Food Processing Line With Coating System

Specifications :

Price	Contact Us
Brand Name	Loyal
Place of Origin	Shandong, China
Min.Order Quantity	1 set
Payment Terms	L/C,D/P,T/T,Western Union,MoneyGram
Supply Ability	20days / Snack Food Production Line
Delivery Detail	20days--35days
Packaging Details	Wooden case or wooden pellets depended on clients' requirement
Certification:	CE,ISO9001,SGS?BV

Detail Introduction :

Technical Parameter Of Core Filling Snack Machine

Advantages Of Jam Center Snack Food Processing Line With Coating System

Core Filling Snack Machine Configuration

The core puffing snack production line uses high-puffing grains such as powdered corn and rice as the basic raw materials. The twin-screw dry extruder is used to instantaneously puff after strong extrusion. And it puffs and reshapes while filling with chocolate. , Jam and other core materials to produce puffed food with different shapes of sandwich rice crackers. Thus, after drying, the surface is sprayed with seasoning auxiliary materials to enhance the taste. And then a complete set of automatic food puffing snack food production line is packaged.

The snack food production line is mainly used to fill the product with compound sandwiches such as chocolate. Make the product more unique in taste. It is more adaptable to the tastes of the general public. The shaping machine is mainly used to shape the product. According to the market demand, we can reshape the products to adapt to the market shape and size. The performance of the hoist and the screw conveyor are basically the same, both of which are used to convey products.

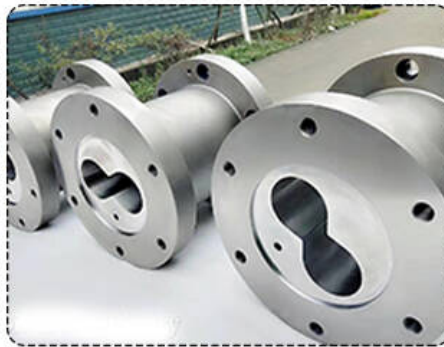

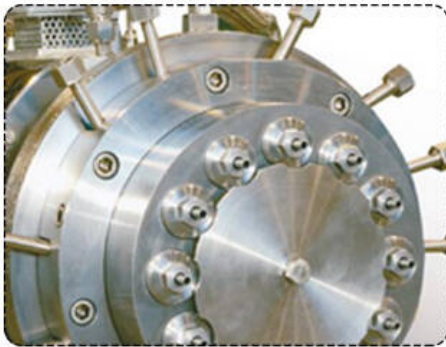

The sandwich-shaped products are conveyed to the electric oven through the elevator to ripen the products. Has reached the effect of being edible. Finally, seasoning is carried out through a double drum seasoning machine or a single drum seasoning machine. This machine is equipped with automatic dusting function, adjustable inclination, convenient operation, high output, safety and sanitation, adjustable mixing time, uniform mixing, and automatic discharging. It can season and mix different shapes of food.

Stainless Steel Jam Center Snack Food Processing Line With Coating System

Technical Parameter Of Core Filling Snack Machine

Stainless Steel Jam Center Snack Food Processing Line With Coating System Parameter			
Model	Output	Size(LxWx H)	Heating Method
LY65	120-150kg/h	19200x1200x2200mm	Gas Or Electrical
LY70	200-250kg/h	21200x1500x2200mm	Gas Or Electrical
LY85	400-500kg/h	26200x3500x4300mm	Gas Or Electrical
LY95	800-1200kg/h	3100X3500X4300mm	Gas Or Electrical

Advantages Of Jam Center Snack Food Processing Line With Coating System

1. In terms of technology, the high productivity jam center snack food processing line with coating system uses corn and rice and other puffed grains as basic raw materials after crushing. After extrusion, puffing, curing, and molding, the starch structure in the powdery material is denatured and gelatinized. At the same time, it has a more homogenizing effect. And it is easier to be digested and absorbed.
2. The core material after being sandwiched is absorbed on the inner wall of the puffed tube and exuded from the inside. The two are blended together. The cold taste of the core material and the warm heat of the puffed grain on the outside form a strong taste contrast, making it a puffed food. Another kind, can make diners instantly feel the veritable "two heavens of ice and fire".
3. Therefore, compared with traditional non-puffed snack foods, the core puffed snacks processed by this double screw extruder high productivity jam center snack food processing line with coating system have the advantages of diversified taste, sweet and delicious, and instant melting in the mouth.
4. In terms of process, high productivity jam center snack food processing line with coating system has no serious pollution such as noise and dust.
5. In terms of operation, high productivity jam center snack food processing line with coating system has a small footprint and is easy to operate. It does not require extra labor to minimize the labor cost of the user.
6. Environmental protection: When the materials are in the production state, no waste water, waste

gas or waste residue is generated during the equipment connection production process, and there is no loss of raw materials during the process.

7.Saving: less labor required per unit of product, less space occupied by equipment, large production capacity, continuous and stable production, and small fluctuations in product quality.

8.Flexible: Wide adaptability, can flexibly change products according to market demand, and even produce products from different industries on the same equipment.

Technical Parameter Of Core Filling Snack Machine

Core Filling Snack Machine Configuration

FLOUR MIXER--SCREW CONVEYOR--DOUBLE SCREW EXTRUDER --CORN FILLING MACHINE--SHAPING MACHINE --HOISTER--DRYER--FLAVORING MACHINE

Core Filling Snack Machine Configuration		
NO.	NAME	DESCRIPTION
1	FLOUR MIXER	Mixer makes the raw material adding to water and other chemical additive fully mixed
2	SCREW CONVEYO	Screw conveyor can not only convey on the level but also by any angel these materials can be conveyed in the stainless steel roller without leaking, dust pollution; Meanwhile it can send the self-mixer to the feeding machine or the conditioner and directly send the discharge hole of the inflating extruder.
3	DOUBLE SCREW EXTRUDER	Series of double-screw extruder mainly consist of feeding system, extruding system, cutting system, heating system, lubricating system and controlling system.Automatic lubricating and forced cooling make sure that extruder performs safely and extends using life.Feeding system, extruding system and cutting system all adopt frequency conversion timing to gain powerful drive, stable perform, and electricity saving.
4	CORN FILLING MACHINE	After core filling for the finish product.
5	SHAPING MACHINE	Cutting the puffing snack in stick shape.
6	HOISTER	Convey the produced feed particles to the multi-layer drying equipment.
7	DRYER	It can be used to bake and dry the food. The oven can bake all kinds of the inflating food, pet food, TVP/TSP food, peanut, nut, chew nut and so on.

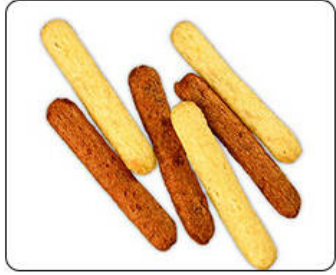

8

FLAVORING MACHINE

Flavoring the core filled snack with oil and flavoring. Oil spraying and powder seasoning can be finished at one drums. the drum with the edges and corners, to avoid the material does not reverse, then ensure the material is seasoned evenly.

Customer Cases For Core Filling Snack Food Processing Machine For Factory In 2021

Shandong Loyal Industrial relies on complete product specifications, excellent product quality and professional services. It has been widely recognized by customers, obtained a good brand image, has mature and stable sales channels, and accumulated a large number of high-quality customers. At present, the company's products are in short supply and are exported to Asia, Europe, North America, Africa, South America and Oceania, with customers in more than 50 countries and regions around the world. If you are interested in the Core filling snack food processing machine, please contact LOYAL immediately, we will provide you with high-quality formulations of Core filling snack food processing machine, professional technical process guidance, and a full range of professional market analysis.

Customer Cases For Core Filling Snack Food Processing Machine For Factory In 2021	
1	1t/h Ce Certificated Rice Pie Snack Food Machine Jam Center Processing Line Core Filling Machine With Factory
2	1t/h New Design Making Puff Rice Puffed Automatic Corn Sticks Food Machine Core Filling Snack Extruder Line For Sale In Puerto Rico Customer Factory
3	1t/h Food Core Filling Snack Processing Line Snack Processing Machine Puffed Food Making Machine Snack Processing Line Manufacturing Plant Installed In Customer Factory For Sale In Bolivia Customer
4	Senegal 1t/h Food Extruder - For Core Filling Snacks Processing Line
5	1t/h Energy Saving Large Core Food Filling Snack Processing Line Snacks Making Extruder Auto Core Machine Puff Filling Snack Processing Line Making Extruder For Sale In Côte d'Ivoire
6	China 300t/Year Snack Food Making Processing Line Grain Processing Machinery Corn Puff Snack Extruder

Customer Second Order Of High Quality Core Filling Puff Extrusion Snack Food Machine Processing Line For Sale At 2021	
1	1t/h Cheese Extruded Crispy Core Filling Pop Corn Puff Snack Processing Line In Uzbekistan
2	1000kg/h Core Filling Snack Food Processing Machine For Sale In Senegal
3	Mozambique 1t/h Fully Automatic Core Filling Snack Food Processing Machine
4	Bangladesh 2t/h Extruded Crispy Core Filling Pop Corn Puff Snack Processing Line Pillow Filled Snack Processing Line
5	1t/h Thai Industrial High Quality Core-Filled Snacks Processing Line Ice Cream Core Filling Snack Food Processing Line
6	Uzbekistan 1t/H Double Screw Extruder Core Filled Rice Snack Food Processing Line
7	Usa 1t/h Double Screw Extruder Core Filled Rice Snack Food Processing Line

8	800kg/h Indian High Quality Core-Filled Snacks Processing Line Ice Cream Core Filling Snack Food Pa
9	Dealed Customer Have Technology Of Double Screw Extruder Core Filled Rice Snack Food Processing

2021Customer Case Of Pay By T/T For Kurkure Snack Food Machine	
1	1t/h Industrial Double Screw Extruder Core Filled Rice Snack Food Processing Line
2	1000kg/h Double Screw Extruder Core Filled Rice Snack Food Processing Line For Sale In Anguilla
3	Bahrain 1t/h Fully Automatic Kurkure Making Machine
4	Bangladesh 2t/h Fdouble Screw Extruder Core Filled Rice Snack Food Processing Line
5	1t/h Bouvet Islands High Quality Core-Filled Snacks Processing Line Ice Cream Core Filling Snack Foo
6	Central African Republic 1t/H Double Screw Extruder Core Filled Rice Snack Food Processing Line
7	Colombia 1t/h Kurkure Snack Processing Line
8	800kg/h Double Screw Extruder Core Filled Rice Snack Food Processing Line
9	Gambia Customer Have Technology Of High Quality Core-Filled Snacks Processing Line Ice Cream Co Machine At 2021
