

Why corn flakes was invented?

Detail Introduction :

The cornflake is a very popular breakfast cereal food. Which is made of corn as the main raw material. Adding white sugar, glucose, salt, vitamins and minerals. It has very crispy taste and unique flavor, which is deeply received by consumers. The approval of market demand is always very high. Today, cornflakes can be said to have become a global food. And have got a lot of people's favorite food, becoming a must-have food, but what do you understand what the cornflake is invented?

Why corn flakes was invented?

When you get up every morning, when you are fascinating. You may not be completely awake. And you will not think about the origin of the cornflakes, because the cornflakes are very common for most people. The existence, or even very inconspicuous. However, in fact, the cause of the inventive cornflakes is not to serve as a breakfast cereal. But to inhibit sexual desire to help the public get a healthier lifestyle.

This is not a very shocking. Yes, the reason why the cornflakes is invented, the initial purpose is to inhibit people's sexual desire. The cornflakes were developed by John Harvey Kellogg and his brother WH. Kellogger in 1894, not to meet the stomach of the morning, not to provide people with convenient breakfast cereals, Just just in order to suppress people's sexual desire.

Kellogg believes that sexual desire, his life is in order to help people get rid of sexual desire. As a very natural, the only successful fertility is considered to be very "not pure" by Kellogger, he is very opposition and masturbation, even, Kellogger has always slept with his wife for many years, from Have not had a husband and wife life.

At the same time, Kellogg is firmly believes that sexual desire will bring a lot of pain to people, will cause a variety of diseases, while the diet will have a big impact on people's sexual desire, and the light diet of cereal can effectively reduce human production. Desire, this is the reason why corn flakes are invented.

John Kellogg and his brother WH · Kellogg in the Wardo nursing homes in Michigan, invented corn flakes and received many people. Whismally, if it is better to add sugar in cornflakes, this is better to invent cornflakes in Kellogge - the inhibition of sexual desire, so the WH finally bought copyrights of

cornflakes, producing sugar The corn flakes, from this cornflakes, flow.

I don't think about the reason why the cornflakes are invented. Is it the big trimming in the court?

Today, the cornflakes have been widely welcomed by the public as a breakfast cereal food. And even have a very vast market that is recognized by many countries. The competition in the corn flakes is also very fierce. And the performance of superior performance will help the manufacturer produce more quality corn flakes.

Corn Flake Production Line is a lot of well-known enterprises in the equipment. Fully automated production methods, and the application of the PLC control system. Making the processing of corn flakes very simple. And has high production efficiency. Corn flake production line is reliable, stable, low price, very high cost performance. Is a trustworthy choice worthy of major manufacturers. It is considerable, using quality equipment to help manufacturers get a more vast market. If you need it, please contact us!
